

Weaving a Basket for School Safety During COVID-19

Mask Usage

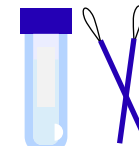

Physical Distancing

Frequent Handwashing

Air Circulation

COVID-19 Vaccines

Frequent Testing

Correct use of face masks at all times in the school and on buses.

Keep your distance from others at all times, especially when eating.

Regular and correct washing of hands with soap and water or hand sanitizer.

Open windows when possible. Use air filtration system if available.

Vaccinating students, teachers, and staff.

Help prevent COVID-19 from entering the school and help stop the spread if it does.

Think of these school safety steps like a woven basket. No single step will stop the virus by itself. But if we combine different steps like we combine woven strands, we can re-open schools safely.
